Introduction To Operating Systems

Course Progress 50.55% (3 of 7)

- Week 2: Assignment Solution
- Week 3: Processes
 - Introduction
 - Create Execute and Exit from Processes
 - System Calls for Process Management
 - Week 3: Lecture notes
 - Week 3 Feedback Form : Introduction to Operating Systems!!
 - Quiz: Week 3 : Assignment 3
 - Week 3: Assignment Solution
- Week 4: Interrupts
- Week 5: Scheduling

Week 3 : Assignment 3

The due date for submitting this assignment has passed. Your last recorded submission was on 2026-08-11, 18:56 IST. Due date on 2026-08-14, 23:59 IST

1. Which of the following statements is true about kernel and memory (RAM) in linux and xv6? 1 Point

- ☐ Kernel resides in the upper part of the memory
- ☐ Kernel resides in the lower part of the memory
- ☐ Kernel does not reside completely in the memory
- ☐ Kernel resides anywhere in memory and this is kept track by a universal page table

No, the answer is incorrect. Score: 0 Accepted answer is Kernel resides in the lower part of the memory

2. State True or false: There is a Kernel stack and a User stack in the process address space to ensure that the attacks that target the stack will not affect the kernel. 1 Point

- ☐ True

Week 3 : Assignment 3

The due date for submitting this assignment has passed.Your last recorded submission was on 2026-08-11, 18:56 IST.

Due date on 2026-08-14, 23:59 IST

☒ All parent pages are initially marked as shared

☐ fork() returns 0 to the parent process

☐ fork() returns parent's process id to the child process

☒ To execute another program in the child process, another system call exec is evoked in the child process after fork

Yes, the answer is correct. Score: 1Accepted answer is All parent pages are initially marked as shared, To execute another program in the child process, another system call exec is evoked in the child process after fork

6. Which of the methods can we use to terminate a process involuntarily?

1 Point

☐ fork

☒ Kill

☐ exec

☐ exit

Yes, the answer is correct. Score: 1Accepted answer is Kill

7. Which of the following are true about zombie entries?

1 Point

☒ A zombie entry is removed when its parent reads its exit status

☐ When the process terminates, it becomes a zombie and is immediately removed
